Ron,
We made an internal "policy" that when we handle samples related to Marcellus Shale we would use the dosimeters to monitor rad exposure. It really is a very conservative action since we do not expect to have any samples with rad levels above normal. All samples are screened before we accept them for analysis. However, the samples are being evaluated for radioactivity by NAREL so this is a precaution until those results start coming in.

Why do we need dosimeters for drinking water samples?

Good Morning Everyone!

I have received the dosimeters. Please drop by my desk to pick yours up as well as provide your SSN and date of birth.

Thanks
Susan
